Quarterly Product Specification

Scope

This document describes the interfaces and the acceptance criteria for the Q4 release, restricted to internal distribution.

Interfaces

The ingestion service exposes a single synchronous endpoint and a batch endpoint backed by the same validation core.

Rollout

Deployment proceeds in three waves with an automated rollback on error budget exhaustion.

Provenance lineage for auditors: generated source digest and run identifiers. run= run-2026-10-26 model=deepseek/deepseek-v4.1-flash.
